Subject: Comments for Board Consideration:

As a tenant grower, having the rules and regulations governing the Greater Kaweah GSA up in the air after the beginning of what should be the current crop year is extremely damaging to my small operation. I would ask that, as a board, you consider delaying action that would penalize growers and stockholders for water use this crop year, call a special session, vote for such action, and announce it by the end of this week.

On what may be considered a political note, it seems a form of insanity to spend trillions (that's with a T) before it's over on a train with questionable ridership but not bring water from where it is to where it is needed, Maybe food shortages will have an impact.
Sincerely

Larry Fink
