Public Comment Field <p>If you need to idle 15.000 acres the only way you can do this is to pay growers not to grow anything. Your current plan will accomplish that by bankrupting growers over time and that is a cruel harsh way to get what the state says you want . The state wants this and they can pay for it. They have funds available as does the federal government. This is your only option that proves you are looking out for our interest and well-being</p> <p>Just do it</p> <p>Louis whitendale</p>
