

Sustainable Groundwater Management Act 2024

SGMA
10TH ANNIVERSARY

September 16, 2024, marks 10 years of The Sustainable Groundwater Management Act.

Over the past ten years, the Greater Kaweah Groundwater Sustainability Agency has not only developed a comprehensive program to manage groundwater within the Kaweah Subbasin but has also submitted a Draft Groundwater Sustainability Plan (GSP) that continues to be revised and reviewed by the State Water Resource Control Board. We continue to support landowners with tools and resources to help them farm under reduced water allocations. Our efforts include programs such as the Land Fallowing Pilot Program, mitigation for domestic wells that have gone dry due to overdraft, and collaboration with other local agencies to address the needs of Central Valley communities.
